

XYLEM

Xylem innovates and collaborates with utilities, industrial manufacturers, buildings operators, and communities, to protect and optimize water. Using global reach combined with local know-how, together with customers, Xylem makes our water resources more sustainable, championing those dedicated to making water work every day.

A decade of innovation and impact

In just a decade, Xylem has grown from a pump manufacturer to a leading global water solutions partner. As the name signifies, "xylem" is the connective tissue and system in plants which cleanses and transports water from the root to where it is needed most to sustain life.

And this is the essence of Xylem as a company. We are committed to driving sustainable impact by ensuring our connected technologies and solutions support our customers and the communities they serve, to tackle the water challenges that matter most to them.

Today, Xylem is leading the way in water with more than 23,000 diverse colleagues around the world, serving customers in more than 150 countries and achieving revenues of \$8.1b, by collaborating with and empowering customers and communities to build a more water-secure world.
